EDUCATION

Bachelors of Science,

Computer Science

Colorado State University

Graduated 2025

PROJECTS

Portfolio Webserver

React | Web Tunnels | Apache

Mar 2025 - Present

Built and launched a personal portfolio using React and Vite on a Raspberry Pi running Apache. This project demonstrates hands-on experience with Linux server administration, web server configuration, and secure tunneling for lightweight edge hosting.

SUMMARY

Detail-oriented software developer with a decade of experience in multiple programming languages such as Java, C++, Python, and JavaScript, focused on clean code, optimized, and scalable applications. Strong foundations in algorithms, computer architecture, and programming language principals, with proven experience in system deployment, performance optimization, and debugging systems. Proficient in learning new programming languages, APIs, and Frameworks. When I am not working on projects, I am learning Japanese on Duolingo or solving programming problems on LeetCode.

EXPERIENCE

IT Support Technician

Fort Collins, CO

Engineering Technology Services

Oct 2023 – May 2025

- Built and deployed computing systems for engineering students and staff.
- Deployed as well as reconciled thin clients to a ‘village’ of students
- Reproduced client errors and resolved issues.
- Troubleshoot student/staff errors using phone, FreshService, RDP, and TeamViewer

SKILLS

Programming Languages: Java, Python, C++, Scala, HTML/CSS, JavaScript, React, PHP, Lua, SQL, Bash.

Database: PostgreSQL, MySQL

Concepts: SOLID Principles, Factory Design, DRY, Unit Testing, Test Driven Development, OOP, Functional Programming.

Soft Skills: Problem-Solving, Determined, Communication, Empathic, Passionate, Teachable.
